PRESS RELEASE

Study Visit to Germany and Belgium

Within the scope of the Project, Denizli Technical Textiles Cluster members and cluster team organized a study visit between 14-18 November 2022 to examine technical textiles production methods in Europe and to observe operations of the R&D and innovation centres on the site.

Denizli Technical Textiles Cluster members and cluster team have initially visited the Kortjik, Gent and Grâce-Hollogne facilities of Belgian Textile Research Center Centexbel, and have had the opportunity to visit on site the Institute of Textile Technology at RWTH Aachen University (ITA) in Germany, obtain information about their R&D studies and share experience.

The members of the Cluster and the cluster team, also participated as a visitor to the MEDICA fair held in Düsseldorf, Germany. Participation to the Fair provided the opportunity to meet with participants from various countries operating in the field of medical technical textiles, to get to know their technologies and to undertake steps for cooperation. At the Fair, the participants also had a chance to visit and wish success to the cluster member Dizayn Medikal, who opened a booth at the fair.
